PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2026) with Python-based full stack development experience through internships and academic projects, including building and deploying a Flask web application with a real-time ML prediction interface. Skilled in backend scripting, data processing, and HTML front-end pages. Seeking an entry-level Full Stack Developer role to build and ship complete web applications.

TECHNICAL SKILLS

Languages: Python, C

Web Technologies: HTML, Flask, Web GUI development

Data & Libraries: Pandas, Matplotlib, OpenCV, MediaPipe

Database: SQL

Operating Systems: Windows, Linux fundamentals

Other: Git basics, debugging, code documentation, data pipeline development

PROJECTS

Intelligent ML-Driven Task Scheduling in Fog Computing Python, Flask, ML

- Built a full-stack web application with a Flask backend and HTML front-end for real-time task input and prediction, connected to a trained ML model.
- Built and compared 3 ML classifiers for IoT task scheduling; best model (SVM) reached ~98% accuracy.
- Integrated the Flask application with the iFogSim simulation framework; cleaned and preprocessed IoT workload datasets with feature engineering.

Hand Gesture Recognition for Social Media Navigation Python, OpenCV

- Built a hand-gesture control system for social media navigation using Python, OpenCV, MediaPipe, and PyAutoGUI, applying real-time computer vision to map gestures to navigation commands.

EXPERIENCE

Python Developer Intern, CODTECH IT Solutions, Hyderabad (Remote) 2025

- Developed Python scripts to automate data extraction and cleaning tasks, cutting manual processing time by ~40%.
- Built data pipelines using Pandas to process structured datasets and generate summary reports for the team.
- Collaborated with senior developers to debug, optimize, and document code for production readiness.

Python Full Stack Developer Intern (Virtual), EduSkills Foundation, Hyderabad 2025

- Analyzed student performance datasets using Python and Excel to surface trends for curriculum planning.
- Built bar chart and line graph visualizations in Matplotlib to present findings to non-technical stakeholders.
- Maintained data accuracy across multiple reporting cycles and submitted weekly analytics reports on schedule.

EDUCATION

B.Tech, Computer Science Engineering, NNRESGI, Hyderabad 2022 - 2026

CGPA: 7.9 / 10.0

Intermediate, Narayana Junior College 2020 - 2022

90.7%

Schooling, Viswabarathi School 2019 - 2020

97.6%

CERTIFICATIONS

- Python for Data Science - CODTECH IT Solutions (2024)
- Data Analytics for Beginners - IBM SkillsBuild (2025)
- Skill Competency Certificate - SOAR: AI to Aspire (NSQF Level 4), Microsoft & NCVET, Skill India
- AI for ALL - Intel Technologies India Pvt. Ltd. & Skill India

LANGUAGES

English - Professional Working Proficiency
